

Hygienic keyboards and mouse for a safe, clean and sterile working on the PC

Skintec, a business unit of Grafos Steel, has enhanced its product range and now offers hygienic keyboards. Following the present needs of a safe and harmless use of the PC the product spectrum contains cleanable and disinfectable keyboards and mouse. It addresses to different sectors such as home environment, offices, hospitals, practioners, pharmacy and food manufacturing facilities.

The new product assortment consists of various types of hygienic and disinfectable keyboards and mouse. It ranges from a washable PC keyboard to completely sealed silicone keyboards for hygiene-restrictive enviroments. „We are able to offer the right keyboard and mouse for nearly all applications where hygiene and sterility is a must“, Skintec´s product manager Sergio Frigerio is stating.

Due to the design of Skintec´s keyboards and mouse, continuous intensive and complete cleaning and disinfection is possible. The products possess a high degree of reliability and durability. All technical features have been developed precisely to meet the requirements in this area. The products are designed in Germany under the highest quality criteria.
